SOLVING STUDENT
ENGAGEMENT

10 STEPS TO SOLVING STUDENT ENGAGEMENT

[READ MORE HERE](#)

Student engagement does not need to be a mystery. Work with a student engagement expert and coach to:

- Measure the current level of student engagement
- Analyze the results and choose the highest leverage area for improvement
- Explore various resources, set a goal, and create a plan to implement new structures and strategies
- Reassess and reevaluate new results after plan implementation
- Reflect on lessons learned and next moves based on progress toward the goal
- Troubleshoot student engagement issues with a seasoned educator that has written and trained extensively in the areas of student motivation and engagement
